

FOR IMMEDIATE RELEASE

Saint Regis Mohawk Native American Entrepreneur Enters The Cannabidiol (CBD) Marketplace With A Groundbreaking Vapor e-Pen Formulation

June 2016 - Saint Regis Mohawk tribal member and businessman Ryan Dale White, is pleased to announce the launch of **Native Releaf's** cannabidiol vapor e-Pen.

"The Saint Regis Mohawk Tribe and all Native North American's have historically used herbs, sweet grasses and other plants given to us by the earth for a variety of functions and purposes", says White. He feels passionately that "CBD is one of mother natures resources that has yet to reach it fullest potential in Indian Country and beyond.

"The internet speaks volumes about CBD however we make no claims regarding its health and wellness benefits" White stresses. "We are simply looking to offer our tribal members and retail customers a tobacco alternative that helps them kick-back and chill."

Native Releaf's CBD is derived from carefully cultivated industrial hemp. The plant is cold-pressed as part of the essential oil extraction process. **Native Releaf** only utilizes certified labs to test each harvest to insure no herbicides, pesticides, heavy metals or other toxic contaminants are ever used in the growing fields. **Native Releaf** uses no vegetable glycerin (VG), or propylene glycol (PG), only the naturally occurring essential oils found in the industrial hemp plant itself.

Mr. White has partnered with cutting-edge hemp and medical marijuana industry expert's Scott Bramble, David Kimmel and Dylan Trotter to deliver the highest quality CBD e-Pen available. There is no nicotine or marijuana used in **Native Releaf**. and **Native Releaf** is pure, clean and not-habit forming. CBD is legal in the United States.

Native Releaf's CBD vapor e-Pen is available in selected retailers located on the Saint Regis Mohawk Reservation and soon to be on reservation vendor shelves throughout the northeast and tax-free to people over 21 years of age.
